

# INFORMATION AND CONSENT FOR DENTURES, PARTIALS, AND IMMEDIATE DENTURES

- ☞ You must rinse and brush after each meal to keep your denture, partial denture, or immediate denture free from food deposits. A denture brush is recommended.
- ☞ When not wearing your denture or partial, keep it moist by soaking them in solution or water.
- ☞ If your denture or partial no longer fits properly, it breaks, cracks or chips, or if one of the teeth becomes loose, please call us immediately.
- ☞ With **immediate dentures**, when having your teeth extracted at the same time as impressions are taken, your bone and gums may shrink and it may be necessary to RELINE your denture or partial anywhere from 2 – 4 months after delivery.
- ☞ **Relines are not included in the cost of dentures, or partial dentures. If a reline is required, an additional fee will be accessed.** Please contact our office to make the appropriate appointment.
- ☞ All relines need to be sent to a special dental lab. In most cases, you will receive your relined denture or partial denture back the same day. Rarely will a reline take more than 24 hours. Please note that you will be without your denture or partial denture during this time.

---

**I have read and understand all care instructions associated with dentures, partial dentures, and immediate dentures. I furthermore have had all my questions answered to my satisfaction. I authorize the dentist to proceed with the required treatment.**
